

Himanshu Singh

QA Automation Engineer / SDET

singhhimanshu9415@gmail.com — +91 8528692848 — LinkedIn: himaanshusingh — GitHub: Himaanshu-Singh

Professional Summary

SDET / QA Automation Engineer with 2+ years of experience designing scalable test automation frameworks for web and mobile applications. Expertise in Selenium WebDriver, Appium, TestNG, and REST API automation. Strong background in CI/CD pipelines, backend validation, and AI-driven automation. Proven impact in reducing regression effort by 70%, improving test stability, and accelerating release cycles.

Work Experience

QA Engineer (SDET) — Delhivery, Gurgaon

Oct 2025 – Present

- Built intelligent automation agent capable of parsing tickets, generating test scripts, executing flows, and sharing reports via email
- Architected hybrid automation framework using Selenium, Appium, and TestNG for scalable cross-platform testing.
- Implemented parallel test execution across multiple devices/environments, reducing regression cycle time by 40%.
- Integrated automation pipelines with Jenkins enabling scheduled, triggered, and CI/CD-based executions.
- Developed REST API automation suites using Rest Assured, improving backend validation and service-level coverage.
- Designed end-to-end automation workflows validating UI, API, and database layers for complete system testing.
- Created reusable utilities, logging, and reporting modules improving execution stability and debugging efficiency.

Associate QA Engineer — University Living, Noida

May 2024 – Oct 2025

- Built AI-based voice-command automation framework using Vosk, Selenium, Appium, and TestNG.
- Automated 200+ test cases integrated with CI/CD pipelines, reducing manual QA effort by 70%.
- Performed API testing and database validation using Rest Assured, Postman, MongoDB, and MySQL.
- Improved system performance by 40% through JMeter-based load testing and bottleneck analysis.

Technical Skills

Languages: Java, Python, JavaScript

Mobile Testing: Android Testing, iOS Testing, Mobile Application Testing, Real Device Testing, Cross-Device Testing, Mobile UI Testing, Firebase Validation, Deep Link Testing, Push Notification Testing

Automation Testing: Appium, Selenium WebDriver, TestNG, Hybrid Frameworks, Page Object Model (POM), Data-Driven Testing, Parallel Execution, Test Automation Framework Development

Manual Testing: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing, UAT, STLC, SDLC, Defect Lifecycle Management, Test Case Design

API Testing: Rest Assured, Postman, Newman, JSON, API Automation, Backend Validation

CI/CD: Jenkins, Git, Bitbucket, GitHub, CI/CD Pipelines

Performance Testing: JMeter, Load Testing, Stress Testing

Databases: MongoDB, MySQL, Firestore, SQL Validation

Tools: Jira, Confluence, Android Studio, Xcode, IntelliJ IDEA, VS Code, Firebase, LambdaTest, Charles Proxy, ADB, BrowserStack

Projects

AI-Based Voice Command Automation Framework

- Developed voice-triggered automation system using Vosk integrated with Selenium and Appium.
- Enabled end-to-end automation execution and saved 6+ QA hours per engineer weekly.

AI-Driven Test Case Generator

- Built test case generation tool using Gemini API for optimized and high-impact scenarios.
- Reduced test design effort by 60% and improved edge-case coverage.

Education

B.Tech in Computer Science and Engineering — PSIT College of Engineering, Kanpur
CGPA: 8.23/10

2023
